Materials

StorSystem **Traditional Series** cabinet construction are 3/4" high performance melamine faced chipboard "MCF." All units constructed from one-piece panels; edge banded with high performance high impact resistance PVC edging. **Panels** are joined with fluted dowel pin construction assembled under controlled case clamp conditions assuring final cabinet squareness and proper joint compression.

Glide & Tilt® Tote Runners specifically **designed for wood construction** are manufactured with fluted tab inserts to inset into predrilled vertical cabinet faces. Side panels are precision bored to receive fluted runner tabs. Runners are secured to wood frames with 1/4" wood screws. Shatterproof Tote Tray Structural Runners, molded from engineering grade Acrylonitrile Butadiene Styrene (ABS) Plastic, is an innovative system specifically designed to allow the accompanying Tote Tray to stop in an angled open position without falling out of the unit, making for easy access and viewing.

Standard cabinet finish is **Pearwood**. Also available in a White Gloss Finish. Custom wood finishes available. Cabinet boxes are fitted with standard wood casters.

Shatterproof **Tote Trays**, constructed from ABS, provide the most flexibility in a three-tiered approach to holistic educational environments. All Tote Trays are uniquely designed with internal radius corners easing cleaning. Each Tote Tray is provided with a ticket window labeling system on one end and the "E-Z PEEL" for large adhesive labels for easy application and removal on the other.

Tote Trays are available in **six different sizes**: 12" wide by 16-3/4" deep "**Slim Line**" Tote Trays available in depths of 3", 6", 9", and 12". The 18-1/2" wide by 16-3/4" deep "**Wide Line**" Tote Trays available in depths of 3" and 6".

Accessories / Enhancement Options

Optional **StorTray Inserts** available in 5 different unique configurations providing ideal opportunities for the smallest of organizational needs. Inserts fit securely within all sizes of Slim Line Tote Trays. When utilizing trays of 6 inches in depth or more, items can be stored beneath the StorTray Inserts. Crystal-clear see-through **Lids**, made of shatterproof ABS plastic, secure the contents of Tote Trays. This innovative lid design resists moisture and dust infiltration within the Tote Tray. Lids work in Glide & Tilt Runners and allow Tote Trays to stack
